Descriptive Sales Trend Analytics Test Case

Module Name:-	Descriptive Sales Trend Analytics (Seller Sales Report)
Test Case ID	DSA-01 to DSA-22
Tester Name	Jara Joaquin T. Jara
Test Case Description	To check that the seller's report shows the right posted, sold and pesos numbers, the sell-through rate and sales trend, and that the screens present them correctly.
Prerequisites:	1. Backend tests run on a clean in-memory database (bun test). Each case starts with empty accounts. 2. DSA-01 to DSA-18 only read data, so they are checked by automated tests. DSA-19 to DSA-22 are screens in the seller app, so they are left blank for a person to run. 3. Dates are in UTC days. Sell-through = sold / posted x 100. Trend = (sold now - sold before) / sold before x 100.
Environmental Information:-	1. OS: Linux 2. Backend API, bun test 253 tests passed, 2026-11-09 3. Seller mobile app on Android, for DSA-19 to DSA-22

Test Case ID	Test Steps	Test Input	Expected Results	Actual Results	Status	Comments
Scenario:	Open the report with no dates (Default Period).					
DSA-01	1. Sign in as a seller with a verified profile.	Seller account	The report covers the last 30 days and compares them with the 30 days right before.	The period was 30 days long and the previous period was 30 days long, ending the day before.	**P**	Automated test. Passed in bun test.
	2. Load the analytics with no from and to dates.	GET /seller/analytics/summary				
Scenario:	Choose October 1 to October 5, 2026 (Custom Range).					
DSA-02	1. Load the analytics with the two dates.	from 2026-10-01, to 2026-10-05	Both end days are included. The previous period is the same length right before: September 26 to September 30.	The period was 2026-10-01 to 2026-10-05 and the previous period was 2026-09-26 to 2026-09-30.	**P**	Automated test. Passed in bun test.
	2. Read the period and the previous period.	period, previousFrom, previousTo				
Scenario:	Send dates that are wrong (Date Check).					
DSA-03	1. Send only a from date.	from 2026-10-01	Each one is refused with a 400 error and a plain message.	All three were refused with a 400 error.	**P**	Automated test. Passed in bun test.
	2. Send a from date after the to date.	from 2026-10-05, to 2026-10-01				
	3. Send a date that does not exist.	from 2026-13-40				
Scenario:	Add up what was posted (Posted Quantity).					
DSA-04	1. Post tomato listings of 50 kg on Oct 1, 40 kg on Oct 2 and 30 kg on Oct 4.	3 listings	The posted quantity is 120 kg. Listings outside the days are left out.	The posted quantity was 120.00.	**P**	Automated test. Passed in bun test.
	2. Add listings outside the days, on Oct 20 and Sep 20.	99 kg and 77 kg				
	3. Load October 1 to 5.	from, to				

Test Case ID	Test Steps	Test Input	Expected Results	Actual Results	Status	Comments
Scenario:	Add up what was sold (Sold Quantity).					
DSA-05	1. Complete pickups of 20 kg, 25 kg and 15 kg on Oct 1, 2 and 4.	3 completed orders	The sold quantity is 60 kg. Only completed pickups inside the days count.	The completed quantity was 60.00.	**P**	Automated test. Passed in bun test.
	2. Add a pending, a cancelled and an old completed order.	9 kg, 8 kg, 7 kg				
	3. Load October 1 to 5.	from, to				
Scenario:	Work out the sell-through rate (Equation 2).					
DSA-06	1. Post 120 kg and complete pickups of 60 kg inside the days.	120 kg posted, 60 kg sold	Sell-through is sold divided by posted: 60 / 120 = 50%.	The sell-through rate was 50 and it was marked as computable.	**P**	Automated test. Passed in bun test.
	2. Read the sell-through rate.	sellThroughRate				
Scenario:	Nothing was posted (Zero Safety).					
DSA-07	1. Complete a pickup but post nothing in the days.	5 kg sold, 0 posted	The sell-through is empty (not a division by zero), it is marked as not computable, and the summary says it could not be calculated.	The rate was empty, the flag was set, and the summary said sell-through could not be calculated.	**P**	Automated test. Passed in bun test.
	2. Read the sell-through rate and the summary.	sellThroughRate, summary				
Scenario:	Add up the pesos (Sales Total).					
DSA-08	1. Complete pickups of 400 and 125.50 pesos, and cancel one of 900.	3 orders	The total is 525.50. The cancelled order is not counted.	The total was 525.50 in both places.	**P**	Automated test. Passed in bun test.
	2. Read the sales total.	completedSalesTotal, totalSales				
Scenario:	Sales went up (Trend, Equation 3).					
DSA-09	1. Complete 40 kg in the previous period and 60 kg in this one.	40 kg, 60 kg	The change is +50% and the summary says sales increased by 50.00%.	The change was 50 and the summary said it increased by 50.00%.	**P**	Automated test. Passed in bun test.
	2. Read the change and the summary.	completedQuantityChange, summary				
Scenario:	Sales went down, or there is nothing to compare (Trend Safety).					
DSA-10	1. Complete 60 kg before and 30 kg now.	60 kg, 30 kg	A drop shows as -50% with a "decreased" summary. With no earlier sales there is no percentage, it is marked not computable, and the summary says it could not be compared.	The drop was -50 with the decreased summary. The new seller had an empty change, the flag was set, and the summary said it could not be compared.	**P**	Automated test. Passed in bun test.
	2. Use a seller with no sales in the previous period.	0 kg before				
	3. Read the change and the summary for both.	completedQuantityChange, summary				

Test Case ID	Test Steps	Test Input	Expected Results	Actual Results	Status	Comments
Scenario:	Filter by one product (Product Filter).					
DSA-11	1. A seller has Tomato and Okra with posts and sales for both.	2 products	Only tomato numbers are shown and the product name is returned.	Posted 50.00 and sold 10.00, for Tomato only.	**P**	Automated test. Passed in bun test.
	2. Load the analytics for the tomato product only.	productId				
Scenario:	Filter by unit (Unit Filter).					
DSA-12	1. A seller has a kilo product and a sack product with sales.	kilo and sack	Only the sack product is counted.	The completed quantity was 3.00 and the unit was sack.	**P**	Automated test. Passed in bun test.
	2. Load the analytics for sacks only.	unit sack				
Scenario:	Count every kind of order (Order Outcomes).					
DSA-13	1. Create cancelled, expired, pending and completed orders inside the days.	4, 3, 2 and 6 kg	Reserved is 15 kg, cancelled 4 kg, expired 3 kg, completed 6 kg. Remaining is the stock left plus the pending reservation.	Reserved 15.00, cancelled 4.00, expired 3.00, completed 6.00, available 10.00 and remaining 12.00.	**P**	Automated test. Passed in bun test.
	2. Read the quantities.	metrics				
Scenario:	Post the same vegetable again (Repeat Listings).					
DSA-14	1. Post the same vegetable and unit before the days and twice inside them.	3 listings	The same vegetable and unit counts as one repeat listing.	The repeat listing count was 1.	**P**	Automated test. Passed in bun test.
	2. Read the repeat listing count.	recurringListings				
Scenario:	Another seller's data (Privacy).					
DSA-15	1. Create a second seller with a large post and sale.	500 kg posted, 100 kg sold	The other seller's numbers never appear.	Seller 1 saw 0.00 posted and 5.00 sold, only their own.	**P**	Automated test. Passed in bun test.
	2. Load the first seller's analytics.	Seller 1				
Scenario:	The extra figures (Insights).					
DSA-16	1. Complete orders for two products and two buyers, one buyer twice, and cancel one order.	4 orders	Orders placed 4, picked up 3, cancelled 1. Average order 150, smallest 50, largest 300, total 450. Best sellers: Tomato 400, Okra 50. 2 buyers, 1 returning. One row for each of the 5 days.	All values matched, with one daily row for each of the 5 days.	**P**	Automated test. Passed in bun test.
	2. Read the insights.	insights				
Scenario:	A period with no sales (Empty Period).					
DSA-17	1. Load a period where the seller has no orders.	Oct 1 to 5	The summary says no completed pickup sales were recorded from the first to the last day. The quantities are 0.00 and there is no average order.	The summary said no completed pickup sales were recorded, the quantities were 0.00 and the average order was empty.	**P**	Automated test. Passed in bun test.
	2. Read the summary and the numbers.	summary, metrics				

Test Case ID	Test Steps	Test Input	Expected Results	Actual Results	Status	Comments
Scenario:	Who can open the report (Access).					
DSA-18	1. Open the report with an unverified seller.	Unverified seller	Both are refused. The report is only for verified sellers.	Both were refused with an error status.	**P**	Automated test. Passed in bun test.
	2. Open the report with a buyer account.	Buyer account				
Scenario:	Pick the days on the calendar (Date Range Picker).					
DSA-19	1. Open Sales Report in the seller app and tap the dates button.	Seller app, Sales Report	1. The days from the first to the last tap are highlighted in blue. 2. The report shows those days in its heading. 3. The numbers match the report from the API for the same days.			
	2. Tap a from date and a to date.	Oct 1 and Oct 5				
	3. Read the highlight and the numbers.	Calendar and report				
Scenario:	Charts and breakdowns (Charts).					
DSA-20	1. Open Sales Report with at least a week of sales.	Seller app	1. Money By Day has one bar for every day, even days with no sales. 2. Each card opens a breakdown when tapped. 3. The charts fit the screen and show the same totals as the cards.			
	2. Look at Money By Day, Busiest Days and Order Results.	Charts				
	3. Tap a card and a bar.	Cards, bars				
Scenario:	The rating shows in yellow (Rating).					
DSA-21	1. Open Sales Report for a seller with reviews.	Seller app	1. The rating number and the star are yellow. 2. The rating shows even when there are no reviews in the chosen days (all-time rating, marked as such).			
	2. Look at the rating tile.	Rating tile				
Scenario:	The product filter fits on a small phone (Filter Layout).					
DSA-22	1. Choose a produce with a very long name in the filter.	Long produce name	1. The produce button stays on its own row. 2. The unit chips are fully visible and not covered.			
	2. Look at the unit chips below it.	Kilo, Sack, Pile
